CRITERIA OF URBAN LANDS:

A. RESIDENTIAL LAND

1. First Class:
   a) Located along concrete road
   b) Where high grade apartment or residential buildings are predominantly situated
   c) Where public utility transportation are exceptionally regular towards the major trading center
   d) Located next to commercially classified lands
   e) Where water and electric facilities are available
   f) Commands the highest residential land in the municipality
   g) Free of informal settlers
   h) Where telephone line and internet facilities may be available.

2. **Second Class:**
   a) Located along concrete or asphalt road
   b) Where semi-high grade apartment or residential buildings are predominantly situated
   c) Where public utility transportation are fairly regular towards the major trading center
   d) Located next to the First Class residential lands
   e) Where water and electric facilities are available
   f) Commands lesser value land the first class residential lands
   g) Free of informal settlers
   h) Where telephone line and internet facilities may be available.

3. **Third Class:**
   a) Located along all-weather road
   b) Where average grade apartment or residential buildings are predominantly situated
   c) Where public utility transportation are less regular towards the major trading center
   d) Located next to the second class residential lands
   e) Where water and electric facilities may be available
   f) Commands lesser value land the second class residential lands.

4. **Fourth Class:**
   a) Located along all-weather road
   b) Where average grade apartment or residential buildings are predominantly situated
   c) Where public utility transportation are less regular towards the major trading center
   d) Located next to the third class residential lands
   e) Where water and electric facilities may be available
   f) Commands lesser value land the third class residential lands.

5. **Fifth Class:**
   a) All residential lands are situated at interior barangays
   b) Along feeder roads
   c) Where Type II or III buildings are predominantly situated
   d) Where public utility transportation are least regular towards the major trading center

e) Located next to the fourth class residential lands
f) Where water and electric facilities may be or may not be available
g) Commands lesser value land the fourth class residential lands.

6. **Sixth Class:**
a) All residential lands are situated at interior and coastal barangays
b) Along feeder and dirt roads
c) Where Type II buildings are predominantly situated
d) Where public utility transportation are least regular towards the major trading center
e) Located next to the fifth class residential lands
f) Where water and electric facilities may be or may not be available
g) Commands lesser value land the fifth class residential lands.

7. **Seventh Class:**
a) All residential lands are situated at interior and coastal barangays
b) Along dirt roads
c) Where Type I and II buildings are predominantly situated
d) Where public utility transportation are least regular towards the major trading center
e) Located next to the sixth class residential lands
f) Where water and electric facilities may not be available
g) Commands lesser value land the sixth class residential lands.

8. **Eight Class:**
a) All residential lands are situated at interior and far-flung barangays
b) Along dirt roads
c) Where Type I and II buildings are predominantly situated
d) Where public utility transportation are least available
e) Located next to the seventh class residential lands
f) Where utilities water and electric facilities may not be available
g) Commands lesser value land the seventh class residential lands.

B. COMMERCIAL LAND

1. **First Class:**
a) Located along concrete road
b) Where trading, social (or educational) activities of the municipality takes place
c) Where concrete of high-grade commercial or business buildings are situated
d) Where vehicular and pedestrian traffic flows are exceptionally busy
e) Apparently commands the highest land value of the municipality

2. **Second Class:**
a) Located along concrete and asphalt road
b) Where trading, social (or educational) activities are considerable high, but falls short from that of the first class commercial lands
c) Where concrete commercial or business buildings are situated
d) Where vehicular and pedestrian traffic flows are considerably busy
e) Commands lesser value than the first commercial land .

3. **Third Class:**
   a) Located along concrete and asphalt road
   b) Where trading, social (or educational) activities are significantly less than the second class commercial lands
   c) Where average grade commercial buildings (type II or III) are situated
   d) Where vehicular and pedestrian traffic flows are fairly busy
   e) Commands lesser value that the second class commercial lands.

4. **Fourth Class:**
   a) Located along concrete and asphalt road
   b) Where trading, social (or educational) activities are significantly less than the third class commercial lands
   c) Where average grade commercial or business buildings (type II or III) are situated
   d) Where vehicular and pedestrian traffic flows are seldom
   e) Commands lesser value than the third class commercial lands.

5. **Fifth Class:**
   a) Located along asphalt road
   b) Where trading, social (or educational) activities are significantly less than the fourth class commercial lands
   c) Where average grade commercial or business buildings are situated
   d) Where vehicular and pedestrian traffic flows are seldom
   e) Commands lesser value than the fourth class commercial lands.

C. INDUSTRIAL LAND

1. **First Class:**
   a) Located along concrete or asphalt road, pier or port, navigable river or seacoast
   b) Located within a distance of not more than 10,000 meters to the major trading centers of the municipality
   c) Where the vicinity is extremely used for industrial purposes.

2. **Second Class:**
   a) Located along concrete or asphalt road, pier or port, navigable river or seacoast
   b) Located within a distance of more than 10,000 but not beyond 50,000 meters to the major trading centers of the municipality
   c) Where the vicinity is extremely used for industrial purposes.
   d) Commands lesser value than the first class industrial land.

3. **Third Class:**
   e) Located along concrete or asphalt road, pier or port, navigable river or seacoast
   f) Located beyond 50,000 meters to the major trading centers of the municipality
   g) Commands lesser value than the second class industrial land.

D. RESORT (Beach or Inland)

1. **First Class:**
   a) Located along concrete or asphalt road.
   b) Where vehicular and pedestrian traffic are busy.
   d) Where amenities such as, swimming pool, spa, function hall, hotel, rooms are available
   e) Where water and electric facilities and internet may be available
   f) Commands the highest value of resorts in the municipality.

2. **Second Class:**
   a) Located along concrete or asphalt road.
   b) Where vehicular and pedestrian traffic are less busy
   c) Where amenities such as, swimming pool, spa, function hall, hotel, rooms are available
   d) Where water and electric facilities and internet may be or may not be available
   e) Commands lesser value than the first class resorts of the municipality

3. **Third Class:**
   a) Located along concrete or asphalt road.
   b) Where vehicular and pedestrian traffic are least busy
   c) Where amenities such as, function hall, hotel, rooms are available
   d) Where water and electric facilities and internet may not be available
   e) Commands lesser value than the second class resorts of the municipality

STRUCTURAL TYPES OF BUILDING

1. TYPE V

Buildings shall be fire-resistive. The structural elements shall be of steel, concrete or masonry construction. Walls, ceiling and permanent partitions shall be of incombustible fire-resistive construction.

Structural steel and reinforced concrete columns and beams. Columns, beams, beams, walls, and roofs are all reinforced concrete. Walls are hollow blocks, reinforced concrete of tile roofing.

2. TYPE IV

Building shall be of steel, iron, concrete or masonry construction. Walls, ceiling and permanent partitions shall be of incombustible fire resistive construction. Except, that permanent non-bearing partitions of one -hour fire resistive construction, may use fire-retardant treated wood within the framing assembly.

A. Concrete columns, beams and walls – but wooden floor joists, flooring and roof framing ang G.I. roofing, walls are in CHB, kitchen and T&B are reinforced- concrete slabs.

B. Concrete columns and beams – but hollow block walls and GI roofings.

3. TYPE III

Building shall be of masonry and wood construction. Structural elements may be of any of the materials permitted by the Building Code; Provided, that the building shall be one-hour fire resistive throughout. Exterior wall shall be of incombustible fire-resistive construction.

A. First Group wooden post, girders, windowsills and heads, apitong floor joists and roof framing, tanguile floorings and sidings, and G.I. roofing.

First group wooden structural framings, floorings and walls on the first floor, and tanguile walls on the second floor and G.I. roofing

First Group wooden structural framings, walls and GI roofings,

B. Third group wooden structural framings, floorings and sidings, and GI roofing.

C. Third group wooden structural framings, floorings and sidings; an and sidings, and G.I. roofing0d G.I roofing , but structural members are sub-standard;

4. TYPE II

Building shall be of masonry and wood construction with protective fire-resistant materials and one-hour fire resistive throughout: Except, that permanent non-bearing partitions may use fire-retardant treated woos within the framing assembly.

Third group wooden structural framings, floorings and sidings, and G.I. roofing but structural members are substandard.

Third group wooden structural framings, floorings and sidings, and G.I. roofing.

5. TYPE I

Building shall be of wood construction. The structural elements may be any of the materials permitted as follows: Nipa houses and similar structures falling under type.
